

**Guiding partners from intractable problems to practical solutions**

**We design and implement programs that ensure organizations, networks and cross-agency teams have the optimal design, the right resources, and the buy-in of all partners working together to achieve peak effectiveness.**

**VITAL**

Are you trying to solve a challenge that is vital to your success?

**COMPLEX**

Is solving the challenge complicated because parties have different priorities and missions?

**HIGH-STAKES**

Will finding the solution be a game changer for your organization and the people it serves?

**We bring a creative, flexible, and uncomplicated approach to those facing vital, complex and high-stakes projects that frequently include:**

- **Convening key partners in new ways**
- **Challenging multi-stakeholder or cross-agency collaborations**
- **Defining and developing processes and priority setting**
- **Consequential resource allocation**
- **Generating buy-in and momentum across diverse partners**

**Springlake Solutions works closely with partners to design and facilitate high-energy, interactive projects that build consensus on key organizational initiatives, enhance performance, and create impact.** Tracey and Mark have a special affinity for and subject matter expertise in health, public health, behavioral health, and public safety.

We know what it feels like to face the frustration and challenge that comes with multi-stakeholder projects and that resources are frequently scarce. Clients who work with us report a better understanding of local challenges, culture, institutions, and personalities to get at practical solutions that build on or use existing infrastructure. We work hand-in-hand with all partners to ensure we harness resources to their most effective uses and make the complex questions visible, understandable and actionable.
